Best service for corporate customers

The ITSPA association has announced that NFON UK, a subsidiary of the European market leader for modern telephone systems from the cloud, has won in the category 'Best Business ITSP (Corporate)'. ITSPA, the voice of the next generation communication industry, is testing providers in Consumer and Business VoIP. Rami Houbby, Managing Director at NFON UK, sees the award as *"an absolute proof of the outstanding range and quality of NFON services."*

A confirmation for the market

ITSPA Award is one of the most important and prestigious awards in the UK. The jury comments on verdict about NFON UK: *"The judges were highly impressed by the rapid growth NFON have demonstrated in this market. They added that the strength of their service has contributed to their excellent reputation and the judges were impressed by the strong and credible case study included in their submission"*. NFON AG was founded in 2007 and is operating in 12 European countries. Rami Houbby: *"NFON is the only cloud solution able to handle all sizes of enterprises across all industries. We are absolutely chuffed to have won the award. It is a confirmation for the market that NFON has a scalable enterprise-grade proposition backed with a world-class service delivery for seamless migration from old to new!"*

Five Reasons for NFON

NFON is a cloud solution 'Made in Germany' that combines over 150 features plus automatic updates with data privacy, TÜV-certified voice quality and reliability. With NFON companies don't have to bind themselves to long term contracts to achieve high cost savings. *"This is a proof point for our leading position in the UK and the entire European market"*, says Dr. Gerald Kromer, CEO of NFON AG. *"It confirms that we have made the right decisions: Quality, usability and security on the highest level. We sincerely congratulate Rami and his team in the UK on winning this award."*

About NFON AG

Business communication around the world is undergoing the greatest change in its history. A modern business phone system in the cloud is an investment in the future viability for businesses of any size or industry. NFON offers unlimited capacities for the challenges faced by companies with 2 to 249,000 employees. NFON is a cloud solution “Made in Germany” and stands for data protection, reliability, and TÜV-certified voice quality. These facts together with the more than 150 intelligent features, simplicity of operation, cost effectiveness and essential security features all contribute to NFON being one of the leading provider worldwide. Operating in 12 European countries, NFON AG has its headquarters in Munich. <http://www.nfon.com/>
