

Same app. Integrated experience.

Like you, we enjoy the comfort of familiarity. We've made sure our extensive range of telephony solutions meet your business needs – whatever they might be – while making working remotely familiar and easier than ever. Integrate NFON to your Microsoft Teams* and see where the connection will take you. Sound good?

Premium

With its feature-rich core, Microsoft Teams* integration with Cloudya is the ultimate answer when business calls:

- Prefer something conventional? No problem; connect with analogue devices such as fax, analogue phones, and DECT systems
- Not one but several DDIs for phone extension and services
- Forward calls whenever and however you want
- Don't let customer relations falter; easily integrate with CRM platforms
- Versatility on the go. Use Call-Pull to swap calls in progress between devices
- Ensure privacy and protect end-user numbers with Caller ID restriction
- Transfer calls easily with a professional switch board
- Get hold of voicemail messages from any phone
- Be ready for all situations with as many as 10 call forwarding profiles
- Comfortably upgrade your analogue fax machine with an eFax extension

Standard

Ready for cloud enablement? A simple solution for those who need a PSTN connection and to be Microsoft Teams* integrated through Nconnect Voice (SIP Trunk)

- Straightforward call handling
- One DDI per user and account
- Accessible voicemail via the Microsoft Teams* apps
- Simple call transfers for convenience
- Only one default call forwarding profile

Anywhere, any time. Flexible working has never been this simple. Boost your business

Save money on unnecessary office space and equipment
