

NFON Cloud Enablement – Nconnect Voice

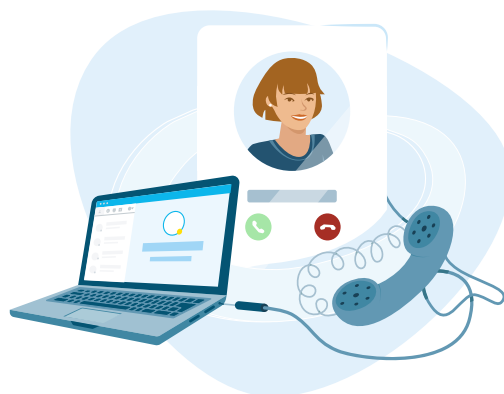

Step into the cloud without updating your infrastructure

The smart interface for All-IP

The forced ISDN shutdown and a decline in traditional on-premises PBX solutions are driving the search for alternative VoIP solutions.

Nconnect Voice enables a seamless transition to flexible, scalable IP communication.

Key features

- Sophisticated security features (call barring, fraud detection)
- Spend management
- Self-service customer and partner portal for easy administration
- Keep your ISDN features and more, with no downtime thanks to the cloud-based solution

Your benefits

- Meet cloud demand without changing your business model
- Access a wider range of markets, with availability across Europe
- Accelerate administration and setup with the NFON self-service portal
- Complete freedom and ease of use with simple installation
- Build solid pan-European cloud expertise, with NFON always by your side

Your customers' benefits

- **Experience a new world of communication with their existing infrastructure until it becomes written off**
- **Up to 50% cost reduction compared to traditional PBX**
- **Easy switch from ISDN to VoIP, with straightforward setup**
- **The only pan-European SIP trunk provider – connect branches all over Europe with one product**
- **Internal calls and calls to Clouduya are completely free of charge**
- **Local sales and support**
- **Extensive functions, plus access to a variety of additional cloud features**
- **Unique security features for a risk-free first step into the cloud**
- **Reduce downtime with guaranteed 99.9% platform availability**

Help your customers turn their traditional telephone systems into All-IP platforms.

Setup of Nconnect Voice is quick and easy with leading SIP gateways and IP telephony systems
